Notes about the structure of the catalogue

Contents – This catalogue contains product information about Siemens VDO screen and headlight washer systems.

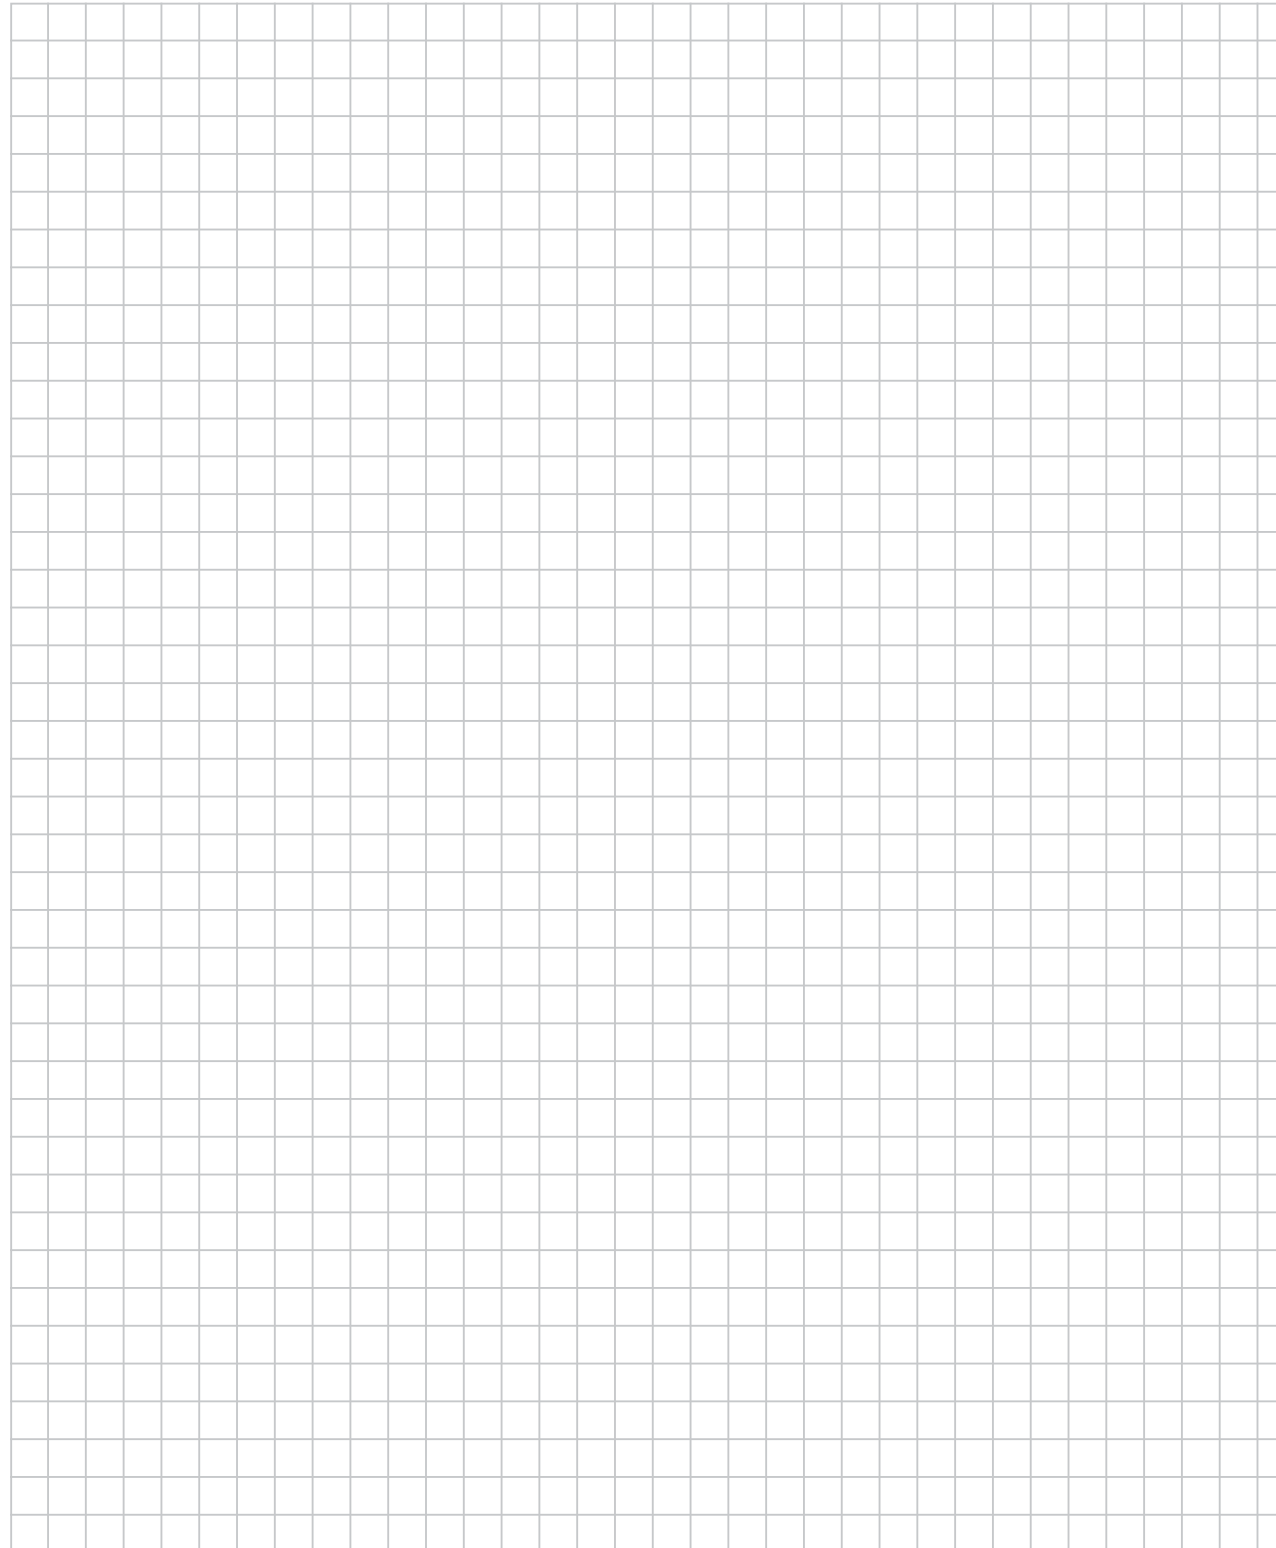

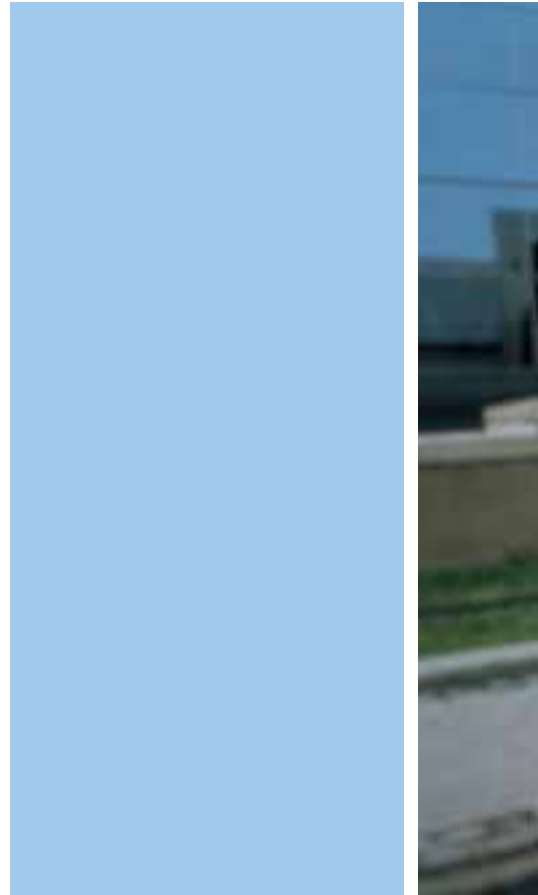

Structure – The first section contains information about Siemens VDO as a company. The subsequent product section is divided up according to product group. This is followed by an overview of all the products and their applications. The individual products are then assigned to the corresponding individual model variants and arranged by vehicle make and model. The list of cross-references at the back of the catalogue features the individual products arranged by OE/Article No.

Abbreviations – An overview of all the abbreviations used in the catalogue can be found on the foldout page at the back of the catalogue.

Please note:

Application – The products described in this catalogue are designed for use in land vehicles, engines and equipment.

Disclaimer – The data in this replacement parts catalogue has been compiled and processed for the purpose of presenting our replacement parts range and is correct to the best of our knowledge. Subject to technical alterations, errors and omissions. Availability is not guaranteed. We cannot be held liable with regard to any information contained in the Siemens VDO replacement parts catalogue except in case of intent, gross negligence or where mandatory liability is borne in accordance with German product liability law.

Legend

Abbreviation	Description
D	Actuator – Door(s)
FFF	Actuator – Fuel Filler Flap
RD	Actuator – Rear Door (Tailgate)
RF	Actuator – Rear Flap (Boot Lid)
RW	Actuator – Rear Window
T1	Front
T2	Rear
T3	Right
T4	Left
T5	Both Sides
T6	Number of Connectors
T7	For vehicles with infrared central locking system
T8	For vehicles without infrared central locking system
T9	Vehicle version
T10	Restriction (manufacturer)

Mobility shapes our life – moving ahead is our passion

Our passion for mobility inspires us to reach new goals, achieve greater progress, and overcome boundaries. This is both our vision and our fascination as one of the world's leading automotive suppliers. It is evident in everything we do. Siemens VDO employees are united around the globe by a common enthusiasm for state-of-the-art vehicle technologies and an awareness of market and customer needs.

An imagination for the possibilities is just as important to us as experience and focused research and development. That's why experts from the most diverse fields work together within our company. Our innovative developments continue to serve as proof of the success of this operational model – success for our customers – and toward the advancement of mobility.

Quality Management System

Genuine brand replacement parts

Alongside our many specialised solutions for automotive manufacturers, we also offer broad-based solutions and service offerings for the aftermarket. Genuine brand replacement parts that benefit from the experience and proven expertise of an OEM supplier are a particular strength. Our comprehensive range of replacement parts is readily available and features a perfect fit for maximum ease of installation as well as consistently reliable quality, offering significant advantages for distributors, workshops and consumers alike.

Our solutions:

- _ Actuators for Central Locking Systems
- _ Sensors for Engine Management
- _ Engine Actuators
- _ Fuel Systems
- _ HVAC Blower and Fan Systems
- _ Screen and Headlight Washer Systems
- _ Sensors for Instrumentation

Counterfeit protection

There has been a steady increase in the number of counterfeit and reproduction parts in recent years. This can have disastrous consequences and cause legal problems if products are of inferior quality. This is why our tamperproof counterfeit protection labelling is being introduced on selected packaged products now to protect you and your customers.

Further information about counterfeit and reproduction parts, and about the new labelling system, can be obtained from your Siemens VDO contact.

Locking and unlocking made easy

Our control elements provide reliability at the touch of a button. Most vehicles are equipped with this useful function (e.g. for locking and unlocking doors, windows, etc.).

These actuators are controlled by the central locking system and/or the remote control. Each actuator's motor operates a lifter that activates and deactivates the lock. Some actuators also feature a central locking switch.

As well as lifters which move freely when not under power, there are also lifters with a reset spring that returns the lifter to the neutral position. Additionally, the lifter may be retained by a latch mechanism and used specifically for antitheft protection.

The product range includes actuators for:

- _ Doors
- _ Tailgates, Rear Windows and Boot Lids
- _ Fuel Filler Flaps
